

HS120 Hand Set

Single Gang Stainless Steel Plate
25V Audio
Rocker Style Switch
Privacy
Grey Security Type Hand Set
Integrated Speaker Breakout

The HS120 Hand Set Station is part of the CH1000 series Security Communications Systems. A HS120 Hand Set Station allows for a private intercom conversations across the CH1000 Communications System and a momentary call-in button to provide a method to annunciate a normal intercom call or an emergency intercom call that is received by the DA1 Display Administrative Console. The HS120 automatically switches the 25V audio from the associated classroom loudspeaker to the handset upon removal from the hook switch. A HS120 also has a latching Privacy feature to allow the user to prevent unauthorized eaves dropping. The HS120 interfaces with a SS16/SS32 Security Switching Card audio port.

The HS120 provides RJ45 connectivity for a CAT 5 cable from the SS16/SS32 Security Switching Card port. The HS120 includes pig tail breakout connectivity for a classroom speaker. Construction consists of soft grey security type handset and a hook switch with a rocker type push button mounted to brushed stainless steel plate for durability.
