The EMCS-900 is more than the sum of its parts. Because of its innovative low voltage design you can have emergency call boxes in places you never thought possible and a reliability and quality you never thought you could afford. No running of costly electrical lines. The EMCS-900 is fully operational with power fed solely through simple low voltage twisted pair wire. The EMCS-900 features supervised lines, modular repair, expandable, and can interface with a multitude of communication systems. ADA compliant and backed by RING’s renowned reliability.
