

GD591 HANDSET FOR AA903/AA905

The GD591 handset assembly may be used with the AA903 and AA905 master-stations. The spiral cord for the K-style handset is standard 4 wire with modular connectors. A magnetic operated hook-switch design is used. The handset assembly is designed for surface wall mounting and a backbox is not needed.

SYSTEM FEATURES:

When the handset is in the cradle the master-station is in handsfree mode using the microphone and speaker on the master-station. When the handset is lifted during a call the speaker/microphone on the master-station is disconnected and the handset is used for confidential conversation. When the handset is placed back on the cradle the call is automatically cancelled.
